

Skypoint *Plus*

Natural Ventilation
For 35mm & 40mm Glazing

Slimline Aluminium & PVCu Clad Roofvent

For 35mm & 40mm Glazing

Introduction

'Skyport' Plus Roofvents are individually custom made to fit into the glazing bars on your roof, maintaining structural integrity. Glazing connector profiles on the top and bottom of the frame accept the roof glazing material or alternatively the top can be pushed into the wallplate or ridge aperture. The frame is factory prepared, mechanically fixed and sealed ready for site installation. The Roofvent lid is simply glazed on site with gasket and silicone.

Custom made Aluminium/PVCu Clad Roofvent
